# QuickScan

## Your guideline to best practices

### What is QuickScan?

QuickScan is a customized, baseline assessment of your facility in the areas of instrument processing and CSSD management. Through a complete analysis of your facility's surgical services, our skilled team of professionals will help pinpoint where improvement in quality and processes are needed.

The results:

- Continuous quality improvement
- Increase in surgical readiness
- Greater return on investment

The QuickScan assessment typically takes 3-4 days.

### What we need from you—

- Availability of both the OR and CSSD leadership team for an initial meeting to develop specific improvement goals and for a final presentation where facility-specific recommendations are presented
- Access to your service team leaders, OR and CSSD staff, and educators for interviews
- Access to your CSSD department and instrument sets to perform observations, inspections and analysis

## What can QuickScan do for you?

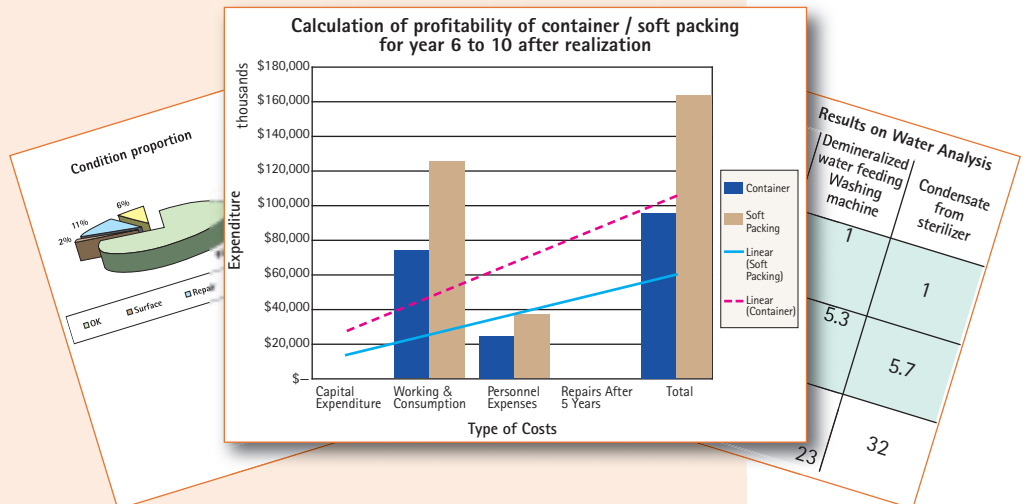

- Reduce errors in the sterilization process
- Improve instrument quality
- Increase satisfaction of CSSD and OR employees
- Provide a comprehensive set of recommendations for the entire sterilization process— an invaluable tool for your budgetary requirements
- Benchmark your processes to other facilities identifying opportunities for improvement
- Identify opportunities for enhanced CSSD throughput

## Our Experience

It is our tradition of excellence and our commitment to sharing knowledge that has made Aesculap the partner of choice for top hospitals throughout the world. Let Aesculap help design an individual solution to meet your instrument management needs in the CSSD and the OR.
