The next step in precision performance
With Aesculap NOIR Supreme Cut Scissors you will experience a new dimension in precise cutting and dissecting performance. The Microtome cutting edge technology permits extremely fine and smooth cutting with minimal force. The cutting blade is precision ground to the sharpest angle.

The combination of the Durotip® tungsten carbide technology with the Aesculap low-reflection NOIR coating, results in an extremely high surface hardness and therefore high-wear resistance.

The Aesculap surface smoothing technology provides a low-wear, internal blade surface which results in increased blade life. The combined Aesculap technologies offer precision performance every time you use your NOIR Supreme Cut Scissors.

- Data matrix code technologies - allows fast machine-readable instrument tracking with instrument management software such as instacount® PLUS.

The extremely hard (2000HV) low-reflection NOIR coating enhances the wear resistance of the instruments and ensures a long life span, while providing high resistance against corrosion.
Precision Performance Every Time

Precision Performance Means *Razor Sharp*
- Microtome technology
  - Precision ground for the sharpest cutting edge

Every Time Means *Consistent High Performance*
- Durotip® TC technology
  - Tungsten carbide blades
- Smoothing technology
  - Low-wear internal blade surface
- Low-reflection NOIR coating
  - Superior wear resistance over full length
Microtome technology ensures ultimate cutting edge precision for both smooth and wavecut blade options. The razor-sharp microtome blade edge offers unparalleled sharpness with minimal use of force.
NOIR Strabismus Dissecting Scissors

NOIR METZENBAUM Dissecting Scissors
The particularly delicate shape permits smooth dissection even in very delicate tissue structures.
